Artifact Rationale

Per the Veteran-focused Integrated Process (VIP) Guide, the User’s Guide is required to be completed prior to Critical Decision Point #2 (CD2), with the expectation that it will be updated as needed. A User Guide is a technical communication document intended to give assistance to people using a particular system, such as VistA end users. It is usually written by a technical writer, although it can also be written by programmers, product or project managers, or other technical staff. Most user guides contain both a written guide and the associated images. In the case of computer applications, it is usual to include screenshots of the human-machine interfaces, and hardware manuals often include clear, simplified diagrams. The language used is matched to the intended audience, with jargon kept to a minimum or explained thoroughly. The User Guide is a mandatory, build-level document, and should be updated to reflect the contents of the most recently deployed build. The sections documented herein are required if applicable to your product.

1. **Introduction**

The Veterans Legacy Memorial (VLM) is provided by the Veterans Legacy Program (VLP) of the Department of Veterans Affairs (VA) National Cemetery Administration (NCA) and is an interactive online memorialization solution designed to honor the service and sacrifice of our Nation’s Veterans. This digital memorial space allows visitors to honor, cherish, share, and pay their respects to Veterans interred and inurned at VA national cemeteries. The VLM platform aims to preserve the legacy of those Veterans by commemorating and sharing their stories.

This platform provides a new and unprecedented service to allow survivors and family members to grieve and memorialize their Veterans digitally. It also presents an academic opportunity as it should be designed to allow researchers, amateurs, students, and professionals to share historical and educational information about Veterans and the cemeteries themselves, some of which date back to the Civil War.

The VLM application was developed with a responsive web page design that “responds to” or resizes itself depending on the type of device it is being seen through as shown below.

1.1. **Purpose**

This guide helps users navigate the VLM system. Users can log into VLM from the VA network, including connections via the VA’s virtual private network (VPN). Regardless of role or network, all users access the VLM application through commercial web browsers, such as Internet Explorer, Microsoft Edge, Firefox, Google Chrome, and so forth.

1.2. **Document Orientation**

The purpose of this user guide is to document the processes and procedures that users of the system will follow. Users will be assigned roles in the system that will provide them access to features they require and features for which they are qualified.
1.2.1. Organization of the Manual

The User Guide contains essential information for the Site Visitor User to make full use of the information system. This manual includes a description of the system functions and capabilities as well as step-by-step procedures for system access and use. Graphics and screen captures are used whenever possible to explain functions and capabilities. The main sections of this guide are:

- Introduction - describes the scope of the document and gives the brief explanation of the application.
- System Summary – an overview of the VLM system including instructions on how to access the system and an overview of use the search functionality.
- Getting Started – an overview of logging onto the system and the system menu.
- Using the Application – an overview of the VLM system for the Site Visitor Users.
- Appendices – provide detailed information about the Service Branches, War Periods, Decorations, and Cemeteries contained in the Veteran’s profile.

1.2.2. Assumptions

This guide was written with the following assumed experience/skills of the audience:

- User has a fundamental knowledge of web applications and their functionality.
- User has basic knowledge of web browser use (Internet Explorer, Microsoft Edge, Google Chrome, Mozilla Firefox, Safari, phone and tablet applications).

1.2.3. Coordination

The VLM extracts information from the National Gravesite Locator (NGL) table from the BOSS database. Information extracted consists of Veteran information, such as NAME, RANK, DATE OF BIRTH (DOB), DATE OF DEATH (DOD), BRANCH of SERVICE, and so forth. VLM requires a valid email address for users to post comments or request Sentry permission to upload additional Veteran content.

1.2.4. Disclaimers

The following disclaimers are provided by the Department of Veteran Affairs (VA).

VA makes no claims or promises about the quality, accuracy, or reliability of user content. VLM is a moderated site and VA reserves the right to make decisions regarding the content. ### 2. System Summary

VLM is a publicly available website that enables virtual memorialization of the millions of Veterans interred/inurned at VA national cemeteries and serves as a mechanism to keep the memory of those Veterans alive. The NCA manages over a hundred national cemeteries as places of honor for the 3.7 million Veterans interred in them. VLM is an online memorialization platform intended to create a digital experience to mirror the on-site national cemetery experience. This platform provides a place for Veterans, service members, their families and survivors to share memories, learn about Veterans, and engage in memorialization.
2.1. System Configuration

The architecture in Figure 2: VLM Data Flow Diagram shows the overall architecture and user flow for accessing the VLM application, the data flow through TIC-in-the-Cloud (TIC) and the use of the NGL Application Programming Interface (API) and the Burial Operations System Support (BOSS)/Automated Monument Application System (AMAS) database.

Data is retrieved from the NGL API and is stored in cache in the VLM database. This cache is then utilized by the VLM application to query and return data to the Apache web server. The web server then renders the page to the user’s device.

Figure 2: VLM Data Flow Diagram

The diagram in Figure 3: VLM Architecture shows the data flow and the use of DynamoDB, and Amazon services CloudWatch, Athena, Elastic MapReduce (EMR), RedShift and Amazon Web Services (AWS) inherited security controls.

| ![Navy and Marine Corps Medal of Honor](image) | Navy and Marine Corps Medal of Honor  
The Medal of Honor is the United States of America's highest and most prestigious personal military decoration that may be awarded to recognize U.S. military service members who have distinguished themselves by acts of valor. The medal is normally awarded by the President of the United States in the name of the U.S. Congress. |
<p>| <img src="image" alt="Army Medal of Honor" /> | Army Medal of Honor |
| <img src="image" alt="Air Force Medal of Honor" /> | Air Force Medal of Honor |
| <img src="image" alt="The Marine Corps Brevet Medal" /> | The Marine Corps Brevet Medal was a military decoration of the United States Marine Corps; it was created in 1921 as a result of Marine Corps Order Number 26. The decoration was a one-time issuance and retroactively recognized living Marine Corps officers who had received a brevet rank. The similar practice of frocking continues in all five branches of the U.S. Armed Forces. |
| <img src="image" alt="The Distinguished Service Cross" /> | The Distinguished Service Cross is the second highest military award that can be given to a member of the United States Army (and previously the United States Air Force), for extreme gallantry and risk of life in actual combat with an armed enemy force. Actions that merit the Distinguished Service Cross must be of such a high degree that they are above those required for all other U.S. combat decorations but do not meet the criteria for the Medal of Honor. The Distinguished Service Cross is equivalent to the Navy Cross (Navy and Marine Corps), the Air Force Cross (Air Force), and the Coast Guard Cross (Coast Guard). |
| <img src="image" alt="The Navy Cross" /> | The Navy Cross is the United States military's second-highest decoration awarded for valor in combat. The Navy Cross is awarded primarily to a member of the United States Navy, Marine Corps, and the Coast Guard (when operating under the Department of the Navy) for extraordinary heroism. The medal is equivalent to the Army Distinguished Service Cross, the Air Force Cross, and the Coast Guard Cross. |</p>
